## THE COLLEGES OF MEDICINE OF SOUTH AFRICA

Incorporated Association not for gain Reg No 1955/000003/08

## Part I Examination for the Fellowship of the College of Pathologists of South Africa – Oral Pathology

(3 hours)

## 1 February 2018

All questions are to be answered. Each question to be answered in a separate book (or books if more than one is required

for the one answer) 1 a) Classify the types of glomerular disease in systemic lupus erythematosus (SLE) and discuss the key morphological patterns of each type. (15)Write notes on necroptosis under the following subheadings b) Main distinguishing features in the pathogenesis of apoptosis and pyroptosis, i) respectively, from necroptosis. (1) Six conditions in which necroptosis is recognised as an important cell death ii) pathway. (3)c) With reference to cutaneous lesions of the pemphigus group of blistering disorders Write notes on the pathogenesis of pemphigus vulgaris. i) (3)ii) Mention four other clinico-pathologic variants within the pemphigus group of disorders. (2)Briefly describe the typical direct immunofluorescence staining pattern of the iii) perilesional skin in a patient with pemphigus vulgaris. (1) [25] 2 Discuss the mechanisms of myocardial infarction in the absence of typical complicated a) coronary atherosclerosis, giving suitable examples. (12)Write notes on the clinico-pathologic features of congenital syphilis. b) (8)Write notes on receptor tyrosine kinase under the following subheadings c) Three mechanisms or types of genetic mutation through which it may constitutively i) (1.5)Salient examples of clinical significance that match each type of genetic mutation ii) respectively. (3.5)[25] Describe the macroscopic and microscopic features of Crohn's disease. 3 a) (13)

Discuss the microscopic features of autoimmune hepatitis.

immunohistochemical markers that assist in the diagnosis.

Describe the microscopic morphology of classic seminoma and

(5)

the

(7) [25]

include

4	a)	Discuss multiple endocrine neoplasia type 1 under the following headings	
	,	i) Genetics.	(2)
		,	(5)
	b)	Discuss non-neoplastic lesions of the prostate that could be confused w	/ith
		adenocarcinoma.	(9)
	c)	Briefly discuss the 3 most important clinicopathologic effects of hypertension on t	he
		brain.	(9)
